Professional Summary

Enthusiastic HIL Test Engineer with over 2 years of experience in Hardware-in-the-Loop (HIL) testing, MATLAB/Simulink, Python scripting, and test automation. Proficient in developing automation frameworks, executing system-level and component-level test cases, and validating embedded systems. Strong problem-solving skills with a focus on delivering reliable, high-quality testing solutions in Agile environments.

Skills

- **Testing & Validation:** Component-Level Testing, System-Level Testing, Regression Testing
- **Test Environment & Tools:** ECU Test Tool, INCA, Control Desk, CDA Tool
- **Automation & Scripting:** ECU Test Tool scripting, Synect
- **Programming Languages:** Python, MATLAB Scripting
- **Communication Protocols:** CAN
- **Version Tool:** ALM
- **Process & Collaboration:** Agile Methodology, Strong Communication and Teamwork

Professional Experience

KPIT Technologies

October 2025 – Present

Associate Engineer

Project: PMBD Engine Controls Manual Testing

- Executed system-level test cases to validate ECU functionality.
- Verified overall system behavior as per applicability matrix using HIL setup, INCA, CDA Tool, and Control Desk.
- Executed component-level test cases to validate individual ECU software modules and control functions.
- Conducted root cause analysis for failed test cases.
- Collaborated with development teams to provide feedback and improve software quality.

KPIT Technologies

July 2024 – September 2025

Project: ICQT Automation Testing

- Scripted and executed automated test cases using ECU Test Tool to validate ECU functionality and improve test efficiency.
- Developed automation scripts and performed batch execution for regression testing.
- Analyzed automation execution logs, identified failures, and maintained test result reports.
- Reworked failed test cases based on developer feedback and re-executed on HIL.
- Executed test cases on Global Medium Engine Turbo Cylinder 4 (GMET4 EVO).

KPIT Technologies

December 2023 – June 2024

Intern

- Worked on Model-Based Design (MBD) using MATLAB/Simulink with guideline checks and test harness creation.
- Performed coverage analysis and simulation using MATLAB scripting and Simulink API.

Education

Bachelor of Technology (B.Tech)

Electronics and Telecommunication Engineering

JSPM's Rajarshi Shahu College of Engineering, Tathawade, Pune

July 2024

Higher Secondary Certificate (HSC)

Science, Jai Hind Junior College, Pune

March 2020

Personal Details

- **Date of Birth:** 22 June 2003
- **Languages (R/W/S):** English, Hindi, Marathi
- **Hobbies:** Travelling
- **Permanent Address:** Snehasparsha Residency, Pune
